Projects

AI-Revenue-Recovery – AI-Powered Revenue Risk Platform | *React, Node.js, Express.js, MongoDB, Claude AI*

- Engineered an enterprise revenue leakage platform, automating recovery workflows across **100+** simulated financial cases to reduce manual review times by **40%**.
- Architected custom **Claude AI** pipelines for predictive risk assessment, generating tailored invoice communications with an estimated **95%** accuracy rate.
- Designed **10+** RESTful APIs using Node.js, Express.js, and MongoDB, integrating React BI dashboards to track **$50K+** in test transaction metrics.

Food Ordering Website – Full-Stack MERN Application | *React.js, Tailwind CSS, Node.js, Express.js, MongoDB*

- Developed a full-stack food delivery application with **React.js** and **Tailwind CSS**, maintaining a mobile-responsive layout for **5+** screen breakpoints.
- Constructed a persistent cart engine using React state, enabling real-time cart manipulation and automated subtotal calculations under **100ms** response time.
- Modeled scalable **MongoDB** and **Mongoose** schemas, optimizing API endpoints to support **200+** mock user requests per minute.

AI Social Media Manager | *React.js, Tailwind CSS, Vite, AI APIs*

- Delivered an AI social media platform automating campaign workflows, enabling users to draft content **60%** faster than manual methods.
- Constructed content engines producing AI captions, targeted hashtags, and post schedules for **100+** posts per session.
- Designed a React.js dashboard with **12+** modular UI components, reducing application state reload times by **25%**.
